

4G MOBILE REPEATER

- Input signal is greater than -45DB.
- Place external antenna at exact outdoor location
- 4G amplifier boost signal from outdoor antenna to indoor antenna
- 12v DC Input

Specifications :

	UP link	Downlink
Frequency	698-716MHz	726-747MHz
	1710-1785MHz	1805-1880MHz
	1920-1990MHz	2100-2180MHz
	890-915MHz	935-960MHz
	1920-1990MHz	2110-2180MHz
	2500-2570MHz	2620-2690MHz
Power	-70 ~ -40 dBm / FA (1.23MHz)	
Gain	60±3DB	65±3DB
Max Output Power	+23dBm/±3DBM Total Power	
Impedance	50	
Seclusion	>70dB	
Power Supply	AC 110/220V (used AC/DC Adapter12V/5Vdc)	
Compact Design	Indoor Use	
Item dimension	210 x 160 x 20 mm	

The external antenna part of the installation is the location and orientation of network strength.

The external antenna should not be within 5m of an active TV or satellite antenna

Ensure that the entire length of cable is completely uncoiled and free from any sharp bends or kinks

Amplifier bridge between outdoor antenna and indoor antenna.
